PROGRAM OBJECTIVES

“**Workplace Spanish® for Health Care**” is a general program, developed for broad appeal and wide application to the health care community. It is concise, easy to teach and learn and it has been our most popular program. It is a “first step program”, applicable to providers, clinics, hospital personnel and other medical professionals.

“**Workplace Spanish® for Hospitals & Nurses**” is much more in-depth, covering all the topics in *Health Care* AND a great deal of clinical content for nurses, technicians & therapists. There are also learning topics for hospital administrative and support staff.

BOTH PROGRAMS:

- are designed to improve communication with Spanish-speaking patients and their families, reduce the need for medical interpreters in **non-critical situations**, and improve the quality of patient care.
- can be purchased as “Learning kits” OR downloaded as PDF eBooks & MP3 Audio tracks

LEARNING KIT PRICING (as of 4/2/16)

(please note that prices are subject to change without notice)
